

1. Screen: Doctor

- Doctor screen patient profile not showing his patients (current and past)

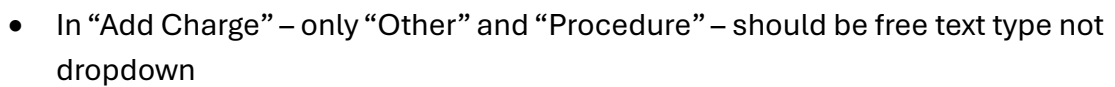

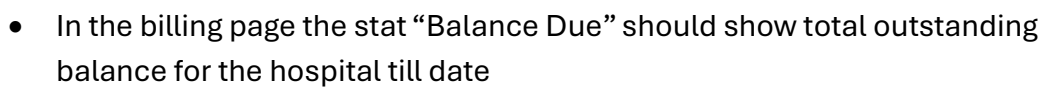

2. Screen: Cashier

- Cashier should not be able to see bed grid in the IPD page

- Cashier should not see “Vitals” & “Nurse notes” in the patient profile of a IPD patient (refer below screenshot)

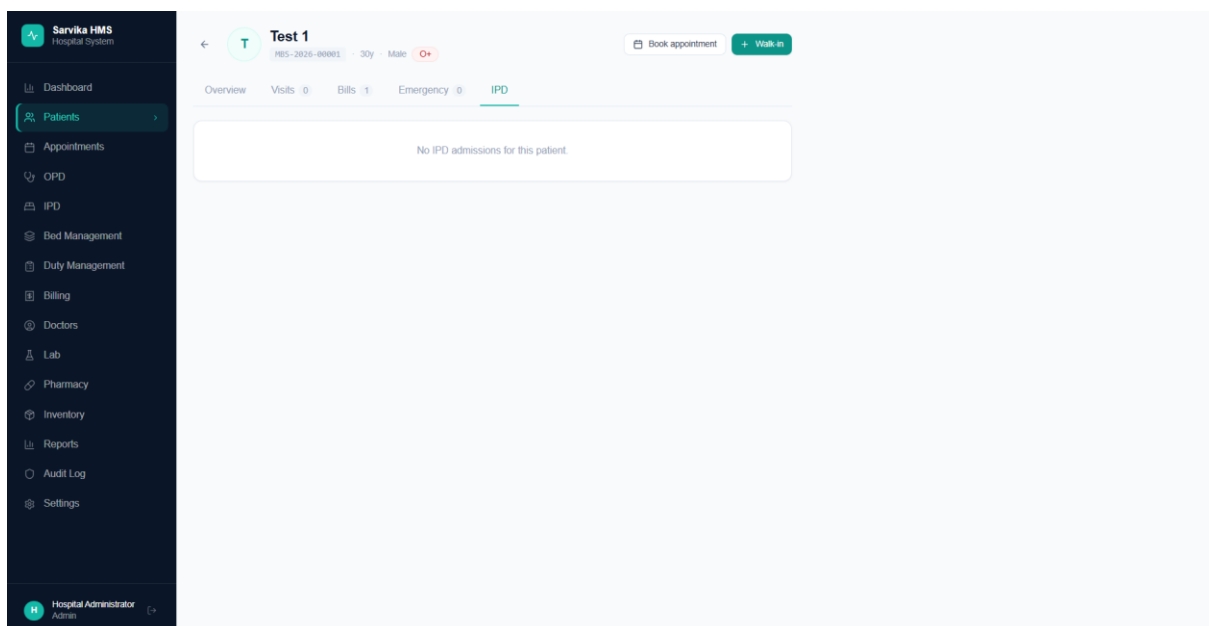

The screenshot shows a modal window titled "Add Charge". It contains the following fields and controls:

- TYPE:** A dropdown menu with "OTHER" selected.
- ITEM NAME *:** A text input field containing "Ghoosh". Below the field, a message reads "Not in catalog — price will be ₹0".
- QUANTITY:** A text input field containing "1".
- NOTES:** A text input field containing "Optional".
- Buttons:** "Cancel" and "Add Charge" (highlighted in green).

3. Must modifications:

- In patients page – once a patient has been discharged from IPD Admission – the IPD visit history is not being shown in the patient profile under IPD (please refer to the below screenshot)

- Even after discharging the patient with final settlement from the cashier, the Bill in the patient profile is being shown as partial. I think this happened

because I recorded the payment from the “IPD Patient Profile” and not the billing page – maybe this can be the reason (please refer to the below screenshots). The record payment button in the IPD patient profile page should actually open the record payment box which opens from the billing page.

- Once a doctor initiates a discharge the bed accruing charges should stop accruing at that point.
